

a plurality of second dual axis clamps that are each rotatable, slidable and lockable to a  
5 respective second rod and that are each rotatable, slidable and lockable to a third rod that is  
disposed generally transverse to the respective second rod;

a plurality of third dual axis clamps that are each rotatable, slidable and lockable to a  
respective third rod and that are each rotatable, slidable and lockable to a fourth rod that is  
disposed generally transverse to the respective third rod; and

10 a plurality of fourth dual axis clamps that are each rotatable, slidable and lockable to a  
respective fourth rod and that are each rotatable, slidable and lockable to a fifth rod.

8. The fixture recited in Claim 7 further comprising a plurality of fifth dual axis clamps  
that are each rotatable, slidable and lockable to the fifth rod and that are each rotatable, slidable  
and lockable to a sixth rod.

9. The fixture recited in Claim 1 wherein a plurality of first dual axis clamps are  
securable to a base and wherein the fixture further comprises a plurality of fifth dual axis  
clamps that are each rotatable, slidable and lockable to the fifth rod and that are each rotatable,  
slidable and lockable to a sixth rod, and wherein the sixth rods support the fifth rod at different  
5 positions above the base.

11. A universal holding fixture for holding an object, comprising:  
a base; and

an articulated structure secured to the base that comprises a plurality of dual axis clamps  
that are each rotatable, slidable and lockable to at least one rod, which rod and clamps are  
5 rotatable, slidable and lockable relative to each other to position the rod at varying and arbitrary  
angles, and wherein ends of selected ones of the rods are suitably positioned and secured to  
hold the object.

12. The fixture recited in Claim 11 wherein a fixed rod is secured to the base and the  
articulated structure comprises eight dual axis clamps that are rotatable, slidable and lockable to  
six rods.

13. The fixture recited in Claim 12 further comprising two additional rods that are  
rotatable, slidable and lockable to a selected one of the six rods by way of two additional dual  
axis clamps.

14. The fixture recited in Claim 11 wherein the articulated structure comprises:  
a plurality of first dual axis clamps that are each rotatable, slidable and lockable to a  
fixed rod and that are each rotatable, slidable and lockable to a second transverse rod;

a plurality of second dual axis clamps that are each rotatable, slidable and lockable to a  
5 respective second rod and that are each rotatable, slidable and lockable to a third rod that is  
disposed generally transverse to the respective second rod;

a plurality of third dual axis clamps that are each rotatable, slidable and lockable to a  
respective third rod and that are each rotatable, slidable and lockable to a fourth rod that is  
disposed generally transverse to the respective third rod; and

10 a plurality of fourth dual axis clamps that are each rotatable, slidable and lockable to a  
respective fourth rod and that are each rotatable, slidable and lockable to a fifth rod.

15. The fixture recited in Claim 14 further comprising a plurality of fifth dual axis  
clamps that are each rotatable, slidable and lockable to the fifth rod and that are each rotatable,  
slidable and lockable to a sixth rod.

17. A universal holding fixture for holding an object, comprising:

a base; and

an articulated structure rotatably secured to the base that comprises:

5 a plurality of first dual axis clamps that are each rotatable, slidable and lockable to a  
fixed rod and that are each rotatable, slidable and lockable to a second transverse rod;

a plurality of second dual axis clamps that are each rotatable, slidable and lockable to a  
respective second rod and that are each rotatable, slidable and lockable to a third rod that is  
disposed generally transverse to the respective second rod;

10 a plurality of third dual axis clamps that are each rotatable, slidable and lockable to a  
respective third rod and that are each rotatable, slidable and lockable to a fourth rod that is  
disposed generally transverse to the respective third rod; and

a plurality of fourth dual axis clamps that are each rotatable, slidable and lockable to a  
respective fourth rod and that are each rotatable, slidable and lockable to a fifth rod.

18. The fixture recited in Claim 17 further comprising a plurality of fifth dual axis  
clamps that are each rotatable, slidable and lockable to the fifth rod and that are each rotatable,  
slidable and lockable to a sixth rod.

### REMARKS

Regarding the status of the present application, Claims 1, 3, 5-9, 11-15, 17 and 18 have  
been amended, and Claims 1-19 are pending in this application. Reconsideration of this  
application is respectfully requested. It is respectfully submitted that the present response does  
not require further searching on the part of the Examiner. It is also respectfully submitted that  
this response places this application in condition for allowance, or in any event, places it in better  
condition for consideration on appeal.
